## Dehaco DTS Floor strippers for the removal of floor coverings

Dehaco Floor strippers are easy to use stripping machines for efficient and easy removal of all types of flooring. They are highly efficient, silent and easy to manoeuvre. DTS Floor strippers can be used to remove most (old) floor coverings such as linoleum, vinyl and carpet.

### Environmentally friendly

DTS Floor strippers have no emissions and are extremely quiet. This will make it possible to work with other professionals and staff in the vicinity.

### Easy to operate and manoeuvre

DTS Floor strippers can pass through standard doors and fit in the lift. Therefore, they are ideal for renovations on upper floors and in rooms with limited access.

### Safety

Safety is essential at any demolition or renovation site. For this reason, the DTS series includes a number of features to ensure the safety of user and bystanders. For instance, the strippers are controlled by thumb buttons that immediately stop the machine as soon as they are released. The machines are also equipped with an emergency stop that switches everything off immediately in the event of an emergency.

### Features of DTS100, DTS170 and DTS220

- Suitable for work in confined spaces
- Powerful motor with starting current limiter
- Great ease of operation due to forward and reverse drive
- Silent motor
- Optimum safety thanks to safety switch
- Secure operation by means of thumb buttons
- Easy to transport
- Optional handy transport frame
- Various blades available
- Available in 230 and 110 Volt versions

## DTS100 and DTS170 Floor strippers

### *Compact electrically powered floor strippers*

Dehaco DTS100 and DTS170 are powerful and compact machines. Thanks to the forward and reverse drive positions, these machines are very user-friendly as well as ideal in confined spaces. The DTS100 and DTS170 produce minimal noise and vibration levels, making them ideally suited for renovations in office buildings, for example, where staff are still present. Another advantage is that these strippers have a separate drive motor and stripper motor, so you always have maximum cutting force and a fast reverse drive.

### Technical specifications

#### DTS 100

- Voltage 230/110 Volt
- Power 1.65 kW
- Weight 90 kg
- Working width 250 mm
- RPM stripper motor 2840 rpm

#### DTS 170

- Voltage 230/110 Volt
- Power 1.65 kW
- Weight 170 kg
- Working width 350 mm
- RPM stripper motor 2840 rpm

Item No.	Description Floor stripper	Contents
6610.0003	Dehaco DTS100 Floor stripper 230 Volt	per item
6610.0009	Dehaco DTS100 Floor stripper 110 Volt	per item

Item No.	Description Floor stripper	Contents
6610.0002	Dehaco DTS170 Floor stripper 230 Volt	per item
6610.0010	Dehaco DTS170 Floor stripper 110 Volt	per item
6625.0035	Optional Transporter for Dehaco DTS170	per item

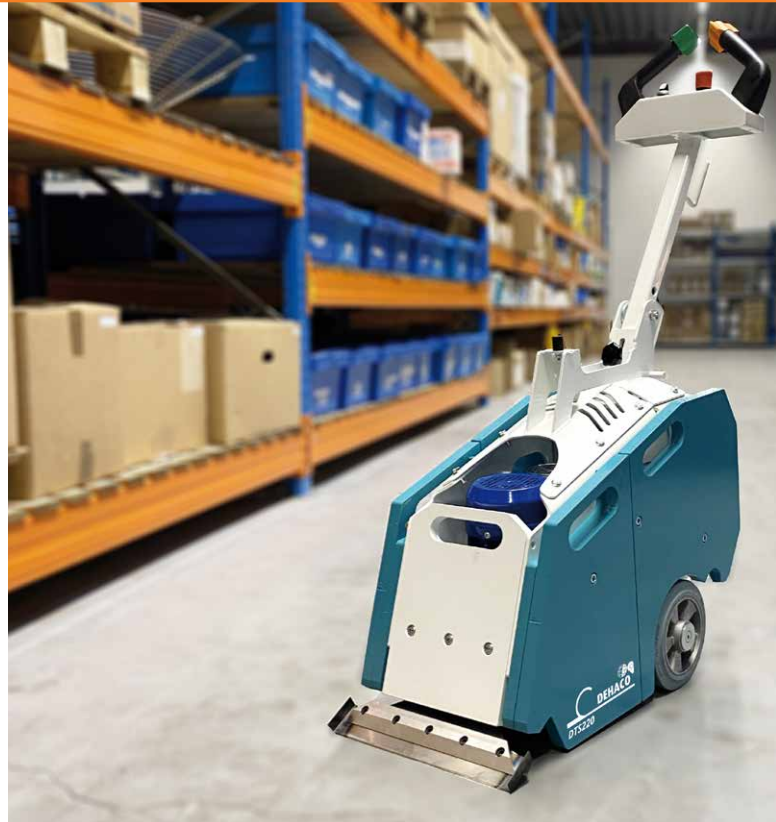

## DTS220 Floor stripper

*More power, more cutting force and highly manoeuvrable*

The DTS220 has the powerful and effective features of the DTS170, but has much more cutting force and much better manoeuvrability.

The DTS220 has two drive motors and one stripper motor. This is important because, in addition to perfect floor stripping, speed and optimal manoeuvrability are important requirements for a good Floor stripper.

With the DTS 220, each wheel is driven separately and the machine can even turn on its own axis. This makes the DTS220 a great choice for the smallest of spaces as well as for larger areas, such as sports halls!

### Technical specifications

#### DTS220

- Voltage 230 Volt
- Power 2.2 kW
- Weight 220 kg
- Working width 350 mm
- RPM stripper motor 2840 rpm
- Dimensions (when used, l x w x h) 90 x 35 x 130 cm
- Dimensions (during transport, l x w x h) 75 x 35 x 80 cm

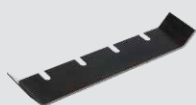

Item No.	Description	Contents
6610.0011	Dehaco DTS220 Floor stripper 230 Volt	per item
6610.0012	Optional Transporter for Dehaco DTS220	per item

## Blades Floor stripper

The reversible blades ensure top performance. The blades are ideally suited for all kinds of subfloors and the U and V profile blades cut the floor into strips without any intervention by the operator.

### V shape blade

250 x 60 x 1 mm

350 x 60 x 1 mm

### V shape blade

A V shape blade has extra cutting surface on the raised sides. Thanks to these raised sides, the floor to be stripped can be immediately cut into strips. A somewhat sturdier underlay such as jute requires more cutting surface than the U blade has. In that case, the V blade will be the correct solution!

### Flat blade

250 x 60 x 1 mm

250 x 120 x 1 mm

350 x 60 x 1 mm

### Flat blade

The flat blade is a universal blade and can be used for removing all types of floors.

### Extra wide flat blade (120 mm)

Choose this type of blade if more force is required to remove the floor.

### Flat blade with kink

350 x 60 x 1.5 mm

### Flat blade with kink

When the floor is firmly attached and extra pressure is required on the blade, this flat blade with kink will be most suitable. The changing angle of the blade increases the pressure on the cutting surface.

### U shape blade

350 x 60 x 1.5 mm

### U shape blade

This type of blade is ideally suited for removing linoleum floors. The blade cuts the floor to be removed directly into strips, which means that the linoleum floor can be easily removed without any additional action.

# Transport

## Ballast weights & Transportation

The ballast weights are easy to remove, which makes the stripper lighter when it needs to be lifted. For even more convenience and better ergonomic transportability, we have a special transporter available for the heavier models, the DTS170 and DTS220.

Item No.	Description	Contents
6625.0035	Transporter for Dehaco DTS170 Floor stripper	per item
6610.0012	Transporter for Dehaco DTS220 Floor stripper	per item
